Megharaj G Mogaveer

Senior SDET

AI-Driven Senior SDET with 10+ years of experience building scalable QA frameworks, test harnesses, and LLM-powered testing platforms for enterprise systems. Experienced in developing MCP servers and agentic workflows for automated test generation, failure analysis, and root-cause identification using Java, TypeScript, and Playwright.

gm_meghraj96@yahoo.in +91 9731271267 linkedin.com/in/megharajgm meghxraj.github.io Bengaluru, India

SKILLS

AI & Agentic Quality Engineering: Generative AI, LLM-Assisted Testing, AI-Driven Test Automation, AI Test Scenario Generation, MCP (Model Context Protocol), MCP Server Integrations, Agentic Workflows, Prompt Engineering, LangChain.

Programming Languages: Java, TypeScript, JavaScript, SQL, Bash/Shell Scripting.

Automation Frameworks: Playwright, WebdriverIO, Selenium WebDriver, RestAssured, Supertest, TestNG, Cucumber (BDD), Test Automation Framework Architecture, Page Object Model.

API & Integration Testing: REST API Testing, SOAP API Testing, API Automation, Integration Testing, Enterprise Workflow Validation, Postman, SoapUI.

Quality Engineering: Test Strategy, Functional Testing, Exploratory Testing, Regression Testing, End-to-End Testing, Release Validation, Defect Analysis, Root Cause Analysis, Accessibility Testing.

Performance & Reliability: Gatling, Performance Testing, Load Testing, Test Execution Analysis, Allure Reporting.

DevOps & Infrastructure: Jenkins, CI/CD Pipelines, Docker, Kubernetes, Git, GitHub, Agile/Scrum.

EXPERIENCE

Senior Software Test Engineer

Visa Inc *(Oct 2022 – Present)*

- **Designed and developed an AI-powered test management integration using Model Context Protocol (MCP)**, integrating Jira and Zephyr to enable natural-language test creation, test-cycle management, execution updates, reporting, and traceability through **15+ automation functions.**
- **Developed TypeScript-based agentic workflows leveraging LLM capabilities** to automate client onboarding and generate dynamic forms using Form.io, improving workflow automation and reducing manual intervention.
- **Drove shift-left quality engineering by leveraging agentic workflows** and AI-assisted test generation to identify requirement and design gaps early and expand functional and regression test coverage.
- **Led the modernization of legacy Selenium automation to Playwright, leveraging AI-assisted** testing and MCP-based test agents to improve framework maintainability and test automation capabilities.
- **Architected and implemented a scalable end-to-end automation framework** from scratch using WebdriverIO and Supertest, covering UI, API, and batch processing workflows.
- **Designed and implemented a Gatling-based performance testing framework**, enabling earlier performance validation through shift-left testing practices.
- Integrated automated testing into Jenkins-based CI/CD pipelines and collaborated with DevOps and engineering teams to validate QA-to-production deployments.

- **Collaborated with engineering and security teams to investigate defects**, troubleshoot application issues, and improve release quality through automated validation.

Senior Consultant – SDET
Allstate Solutions Private Limited *(Apr 2020 – Oct 2022)*

- **Designed and developed a lightweight BDD-based API automation framework** using Java, Cucumber, and RestAssured, reducing test execution time by 60%.
- **Automated 500+ regression test cases using Java, Selenium WebDriver, TestNG, Page Object Model (POM)**, and Page Factory, achieving approximately 90% test pass rate.
- **Designed and executed REST and SOAP API validation using Postman and SoapUI**, increasing service-level test coverage by 70%.
- **Integrated automation suites into Jenkins CI/CD pipelines** and established Git-based version control practices to streamline continuous testing.
- Performed root cause analysis of critical production defects, collaborated with engineering teams on issue resolution, and mentored new team members in automation practices.

Test Engineer
Infosys Limited *(Sep 2016 - Apr 2020)*

- Executed functional, integration, exploratory, end-to-end, and regression testing for enterprise banking applications in the FCCT domain.
- Developed Selenium WebDriver automation using Java, covering 100+ test scenarios and achieving approximately 40% automation coverage.
- Utilized UFT/QTP, ALM, Jira, and VersionOne for enterprise test management, defect tracking, and test execution.
- Led a portfolio automation initiative focused on SLA compliance and developed Excel VBA utilities for test data processing and reporting.

EDUCATION

Bachelor's of Computer Applications *(2013-2016)*
University of Mysore - 79.23%

CERTIFICATIONS

- Cloud Computing Core by IBM on EdX
- Testing Technologies Basics by Infosys
- Infosys Certified Selenium Advanced Tester
- Infosys Certified Global Agile Tester
- Infosys Certified Global Java Tester

AWARDS

- Standing Ovation Allstate Solutions Private Limited
- Star of the Month (2x) Allstate Solutions Private Limited
- Applause Allstate Solutions Private Limited
- Insta Award (3x) Infosys Limited

ADDITIONAL SKILLS

Team leadership, Cross-functional collaboration, Project management, Problem Solving, Solution providing, Analyzing client requirements
