gm_meghraj96@yahoo.in | +91 9731271267 **Bengaluru, India**

GenAI-Driven SDET with 9+ years of experience in automation, AI-assisted testing, and scalable QA framework development for enterprise applications. Expertise in MCP (Model Context Protocol) servers, agentic workflows using LLM frameworks, and modernization of automation stacks. Strong background in shift-left testing, CI/CD integration, API automation, and end-to-end quality engineering for high-scale production systems.

SKILLS

GenAI & AI-Driven Testing: GenAI Testing, AI-Assisted Testing, LLM-Based Testing, MCP (Model Context Protocol), Agentic Workflows, Prompt Engineering, AI Test Case Generation
Automation & SDET: Playwright, Selenium WebDriver, WebdriverIO, Rest Assured, TestNG, Cucumber (BDD), Supertest, Test Automation Framework Design & Architecture
API, Performance & QA: REST API Testing, API Automation, Postman, SoapUI, Gatling (Performance Testing), Allure Reports, End-to-End (E2E) Testing, Regression Testing, Functional Testing, Accessibility Testing
DevOps & Technologies: Java, TypeScript (Basic Proficiency), Jenkins, Docker, Git, Bash/Shell Scripting, SQL/MySQL, CI/CD Pipelines, Agile (Scrum)

EXPERIENCE

Senior SDET — Visa Inc *(Oct 2022 – Present)*

- Implemented LangChain-based agentic workflows to enable self-service client onboarding and automated form generation using Form.io.
- Architected and developed an MCP (Model Context Protocol) server integrated with Jira for AI-driven test management and agentic QA workflows, reducing manual testing effort by up to 80%.
- Led migration of legacy Selenium automation framework to Playwright leveraging AI-assisted testing and MCP-based test agents for improved speed and maintainability.
- Leveraged GenAI tools for test case generation, debugging, and automation optimization.
- Built scalable end-to-end test automation framework from scratch for UI, batch, and API testing using WebdriverIO and Supertest.
- Implemented Gatling performance testing framework adopting a shift-left testing approach and collaborated with DevOps on CI/CD pipelines to ensure seamless QA-to-Production deployments.

Senior Consultant- SDET — Allstate Solutions Private Limited *(Apr 2020 – Oct 2022)*

- Developed lightweight BDD-based API automation framework using Cucumber and Rest Assured, reducing execution time by 60%.
- Automated 500+ regression test cases using Java, Selenium WebDriver, TestNG, POM and Page Factory achieving high reliability and ~90% pass rate.
- Performed REST/SOAP API testing using Postman and SoapUI and increased service test coverage by 70%.
- Integrated Jenkins CI/CD pipelines and Git-based version control to streamline QA automation workflows and performed RCA for critical production issues while mentoring new hires.

Test Engineer — Infosys Limited *(Sep 2016 - Apr 2020)*

- Performed Manual, Integration, End-to-End, and Regression testing in banking FCCT domain applications.
- Developed Selenium (Java) regression automation scripts for 100+ test scenarios achieving ~40% automation coverage.
- Worked with UFT, QTP, ALM, JIRA, and VersionOne for enterprise test management and defect tracking.
- Led Portfolio Automation initiative for SLA compliance and built Excel VBA macros for test data processing and reporting.

AWARDS

Standing Ovation – Allstate Solutions | **Star of the Month** (2x) – Allstate | **Applause Award** – Allstate | **Insta Award** (3x) – Infosys

EDUCATION

Bachelor of Computer Applications — University of Mysore (2013–2016) | 79.23%
